-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11-10-2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Detailed Action

1.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gilman.

Gilman teaches a color calibration job identification system, shown by figure 1, comprising: a printed page 32 on which at least one color target is printed, see col. 4, lines 10-12; and a patch code 46 printed on the page to provide additional data useful to the color calibration, see col. 4, lines 25-27.

What is not specifically discussed is the patch code containing an identification data for tracking a calibration state.

Based on the specification, as best can be interpreted by the examiner, the specific language of a calibration state is not mentioned. The specification does not specifically refer to a tracking of a calibration state.

However, as best can be determined by the examiner, the claimed limitation seems to be suggested by what is clearly stated as a limitation well known in the art. Applicant refers to a scanner from Gretag Imaging Corp. According to page 3, lines 12-21, this specific scanner from Gretag is responsible for using the identification data in a patch code for tracking spectro-photometric values. Hence, this limitation is clearly taught or would have been suggested or taught by the prior art. The limitation is at least made obvious in view of the prior art teaching.

2.

Claims Allowed

Claims 2-15 have been rewritten to depend from allowable subject matter indicated so in the office action of 07-01-2004.

Claims 16-22 are allowed for the reason the prior art does not teach in claimed combination, "... printing a first portion of a patch code including a start code on said printed page, wherein said start code includes two or more color patches wherein each of said patches is comprised of a predefined color... printing a second portion of a patch code including job identification data wherein said job identification data includes two or more color patches wherein each of said patches is of a color selected from a plurality of colors, each of said colors indicative of a unique datum value."

3.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
